

Quaderna

Quaderna (Timber): *“A series of wood ribs to form a boat and reinforce it at the same time”.*

(Emerencià Roig: Fishing in Catalonia; 1927)

What is Quaderna?

An artisan consultancy and a workshop of ideas.

As in a [shipyard](#), we do measured and original projects. We work with an interdisciplinary sight in order to present solutions as a whole for each need.

The shipyards build all kinds of boats (...). People skilled in the sea life, at first glance, through the boats' shape and some other details, they guess the site where they have been built.

An expert crew.

An enterprise piloted by [skilled people](#) in the management of institutional environments and the development of public, managerial and organizations projects.

Fishermen are skilled people in meteorology, the knowledge of which acquire with experience, during many years of sailing. They predict the weather forecast, the state of the sky and the sea, the winds and clouds in the sky.

Quotations and images are extracted from the book by Emerencià Roig "Fishing in Catalonia".
Publisher Barcino; Barcelona, 1927.

What does Quaderna?

We help in decision-making to define and develop projects.

We work as a **net**, with the best collaborators and **appliances**.

Nets are the most productive and important fishing tackles, as they allow to fish much and more variety of fish classes.

The navigation appliances are devices conveniently arranged with strings and poles, fishermen use them to manoeuvre at sea.

Xarxa de l'art

Main working areas:

Tourism and heritage:

- Tourism strategies and projects
- Touristic guides, routes and signposting
- Museology and museography projects
